**Course Description:** This course uses Google Earth as a cutting edge technology to generate projects that engage students in solving geospatial problems. Teachers will learn to design innovative lessons applied to all subject areas by using and showing the topography of planet Earth in a more dynamic and interactive way. During each class a new tool will be demonstrated through real class examples followed by assisted practice in order to master the software. At the end of the course the participants will be able to efficiently integrate Google Earth into his/her lesson plans and will explore other interesting extensions for this software such as GPS coordinates or GIS analysis.

**Course Requirements:**

- Participants should have a basic knowledge of browsing files in Windows or Mac environments.
- Everyone should bring a USB flash Drive or Memory Stick.
- Brief readings will be required for all participants.
- A final Google Earth project will be required for participants taking the course for graduate credit.  
(Details will be provided in the course syllabus)

**About the Instructor:** **Daniel Fernandez-Davila** is an active archaeologist (BA Archaeology and Diploma of Anthropological Studies from Catholic University, Peru; MA in Archaeology and Ancient Heritage from University of Leicester, England) who has conducted excavations and mapping projects in the Andes and continues doing independent research in the north high jungle of Peru.
