Course Description: Current trends in technology have tremendous educational potential. The iPod enables teachers to expand their curriculum while meeting the needs of the mobile demands and media rich learning styles of today's learners. Most students already own iPods and educators need to take advantage of the power and potential of the iPod while extending teaching and learning beyond the normal classroom day. iPods are more than just music players. iPods provide another tool for teachers to reach their students. Participants will learn how to put some of their most exciting lessons on iPods for their students to use.

- * View podcasts and sync education podcasts.
- * Create your own by using Audacity, iTunes and GarageBand to provide learning on the go.
- * Download audio books on a multitude of subjects.
- * Experience a wide range of visual content for even more learning opportunities with videos.
- * Learn how to convert File formats and sync to your iPods.

So bring your iPods and let's create lessons to go!

About the Instructor: **Rosey McQuillan** is currently a special educator and the Assistive Technology specialist for the Wellesley Public Schools. She has successfully provided professional development workshops for Pre-K-12 teachers that demonstrate how to use technology effortlessly across all curriculum areas.

*Cancellations: Notice must be given at least **ten (10)** business days prior to the start of program.
 Payment will be processed at that time and refunds will not be granted after that date.
