Course Description: Have you been clicking those shots for years? Would you like to learn the many ways to use them? Then this class is for you. Today our computers can access so many resources on the Internet for digital pictures. The best sites for classroom use will be shared as well as ways to use the sites. Together we will explore digital editing and storage sites, slideshows, and collage opportunities and more. We will also explore ways to enhance your own collection of pictures with resources on the web for digital photos. Copyright issues will also be covered as we work on planning lessons and projects for your students. All that you learn in this class about using photos can also apply to your personal collection of family digital photos too!
